

Printing Requirements

- for customised gambling money -

Use of the fake money:

In addition to a welcome drink or served with the desert, your guests will receive a money bill (fake money) which they can exchange into chips at the gaming tables or at the cash house. Guests can take home their fake money as a souvenir after the event.

Design options:

The standard print of the fake money bills is done on coloured paper in black and white print at a size of 188,5 mm x 65,8 mm (for an overview of the available colours, see page 4). Our listing price includes a design with your logo, the desired currency and your motto, executed by our graphic designer. The price includes one correction step. For each additional design or correction there will be costs of 60,- Euros (net) each. Please find examples of our bills on page 3. The print is front sided with a standard Royal Events backside. Should you wish it we can print your bills in multi-colour and design the backside individually (additional charge). Alternatively, we can print the backside of the bill with the same design as the front (additional charge). We will be happy to advise you personally.

The following data is necessary for a standard print:

- Your logo in JPG-, TIFF- or EPS-format (at least 300 dpi)
- An additional pictures (e.g. from the management) in JPG- or TIFF-format (at least 300 dpi)
- Name of the currency and Motto of your event
- Production time: 7 days by the final print file (the above data is need at least 14 days prior to your event)

If you create the design yourself, please note the following printing necessities:

- Size: 188,5 mm x 65,8 mm, plus 2 mm cut part
- Colour management: CMYK (converted in ISO Coated v2 or ISO Uncoated) without embedded profiles, special colours are possible on request
- Data delivery: please as print-PDF (up to v1.3)
- Production time: 7 days by the final print file

In this case, the fake money bills are printed in a print shop. Therefore, you are completely free in terms of design and colours. The print would be your artwork on both sides on natural white or cream-colored paper. The paper colours on page 4 therefore do not apply to you.
